INVESTMENT OBJECTIVE AND STRATEGY

The objective of the Fund is to maximize income and achieve higher returns compared to regular bank deposits while preserving capital by investing in a portfolio of very liquid, fixed-income instruments and maintaining an average portfolio duration of 1 year or less.

CLIENT SUITABILITY

A client suitability process shall be performed prior to participating in the Fund to guide the prospective Investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The ATRAM Peso Money Market Fund is suitable only for investors who:

- have a conservative risk profile
- give prime consideration to high liquidity and capital security
- have a short term investment horizon
- are seeking better returns compared to time deposit

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

Market Risk. Factors (e.g. macroeconomic developments, political conditions) that affect the overall performance of financial markets may lead to lower prices of securities and losses for investors. ATRAM Trust adopts an active investment management strategy which incorporates market and fundamental research to help mitigate market risk.

Credit Risk. An investor is exposed to credit risk as there is a possibility that a borrower may fail to pay the principal and/or interest in a timely manner on instruments such as bonds, loans, or other form of debt securities which the borrower issued. ATRAM Trust conducts a robust credit analysis for effective investment decision making.

Interest Rate Risk. The purchase and sale of a debt instrument may result in profit or loss because the value of a debt instrument changes inversely with prevailing interest rates. As the prices of bond investments of a fund adjust to a rise in interest rates, the Fund's unit price may decline. Active duration management is undertaken to mitigate interest rate risk.

Counterparty Risk. The Fund is exposed to risks arising from solvency of its counterparties (e.g. custodian, broker, banks) and their ability to respect the conditions of contracts or transactions. ATRAM Trust only deals with reputable and financially stable accredited counterparties.

Reinvestment Risk. When income is received from the investments, or when the investments are sold and reinvested, there is a risk that the return would be lower than the return realized previously.

Liquidity Risk. Liquidity risk occurs when certain securities in a fund's portfolio may be difficult or impossible to sell at a particular time which may prevent the redemption of investment in a fund until its assets can be converted to cash. ATRAM Trusts invests the portfolio in very liquid securities in order to minimize liquidity risk.

Legal and Tax Risk. The interpretation and implementation of laws and regulations are constantly changing and they may change with retroactive effect. There is no certainty that investors will be compensated for any damage or loss incurred as a result of legal or regulatory changes. ATRAM Trust keeps up to date on regulatory developments and consults tax and legal professionals on the interpretation of new laws and regulations.

Investors should be aware and understand that all investments involve risk and that there is no guarantee against losses on investments made in the Fund. The Fund Manager employs strategies to mitigate risks, however, there is no assurance that no loss will be incurred.

OUTLOOK AND STRATEGY

The 30-day Philippine Special Savings Rate remained at 1.3808%.

In February, food and non-alcoholic beverage price increases slowed down, to 2.1% compared to January's 4.2% price increase. Deceleration of price increases were also seen in the indices of alcoholic beverages & tobacco at 18.2%; housing, water, electricity, gas, and other fuels, 1.7%.

Over the month of March, the Bangko Sentral ng Pilipinas cut the overnight policy rate by 50 bps, down to 3.25%. They also reduced the Reserve Requirement Ratio by 2% and gave further indication of more reductions should liquidity in the market not improve.

With time deposit rates starting to rise, the fund has been taking advantage of the high monthly TD rates being offered. The portfolio is mainly invested in various short-term money market placements.
